2. For each such product, provide the following details in respect of resource use (energy, water, raw material etc.) per unit of product (optional):

- (a) Reduction during sourcing/production/ distribution achieved since the previous year throughout the value chain?

In order to reduce the vehicular weight, the focus of the company is on the new and improved technologies so as to achieve higher fuel efficiency as well as it should reduce the environmental impact created by the vehicle, including its material sourcing, production, use and end-of-life stages. Also in order to reduce the fuel consumption, the Company focuses on researching, developing and producing new technologies, such as hybrid engines, electric cars, fuel-cell vehicles. Various

development programs to reduce the consumption of fuel, like the use of lightweight materials, reducing parasitic losses through the driveline and improvements in aerodynamics are also studied and implemented by the Company. At the sourcing stage, the Company work with its suppliers in order to reduce the environmental impacts like, by making use of returnable and recyclable packing solutions for majority of the components thereby managing the cost and the quality, as well as reducing the material use and avoiding waste generation. Some key areas that the Company is currently exploring are the use of hollow camshafts, low density polyamides and magnesium alloys, in order to target the Product sustainability. The Company continuously strives to achieve the sustainability in the Life Cycle of the Product.

(b) Reduction during usage by consumers (energy, water) has been achieved since the previous year?

The class leading fuel efficiencies of the Company's vehicles enable the customers to achieve fuel savings which translate into cost savings as well. The launch of all new REVOTRON engine which epitomizes the FuelNext philosophy of the Company is developed under Futuready philosophy of the Company. It is developed using a range of eco-friendly and future oriented technologies. It also incorporates latest know-how like multi drive modes, allowing the best of economy and driving pleasure. The Company's value proposition in the commercial vehicles is aimed to create vehicles with lowest overall cost of ownership. The Recon business, which reconditions aggregates, extends the life of the aggregates and eliminates the use of fresh resources that might have been consumed for new aggregates.

3. Does the company have procedures in place for sustainable sourcing (including transportation)? If yes, what percentage of your inputs was sourced sustainably?

The Company continually works with its vendors and suppliers to reducing the environmental impacts of sourcing. The Company has an Environment Procurement Policy to engage with its value chain partners on environmental sustainability. Significant initiatives have been taken to reduce the packaging impacts in the supply chain by using recycled / returnable packaging solutions for various components sourced. Transportation and logistics optimization is an ongoing activity to reduce the related environmental impacts. The Pantnagar and Sanand plants have created a vendor park model, wherein the key vendors are situated surrounding the plant. This not only enables to optimize the production related costs but also significantly reduces the environmental impact of transportation of components.

4. Has the company taken any steps to procure goods and services from local & small producers, including communities surrounding their place of work? If yes, what steps have been taken to improve their capacity and capability of local and small vendors?

During the year, the Company has procured 50.88% of the materials (by value) from local sources, where local is defined as the State in which the manufacturing plant is established.

The Company takes significant initiatives in enhancing the capabilities of local and small vendors. Through the AA policy initiatives, this year the Company has added 5 new SC/ST entrepreneurs in the supply chain totaling to 27 in number and extended business of ₹10.99 crores to them.

To ensure reliable and responsible suppliers for automotive production and service parts, the Company expects all its suppliers to adopt the ISO 9001/TS 16949 quality management system frameworks. The Company also encourage its dealers to adopt quality, environmental and safety management systems.

The Company conducts awareness sessions for suppliers on social and environmental issues. Suppliers are provided with managerial and technical assistance to train them on practices and procedures that will ensure improvements in Productivity, Quality, Cost, Delivery, Safety, Moral and Environment (PQCDSE).

5. Does the company have a mechanism to recycle products and waste? If yes what is the percentage of recycling of products and waste (separately as <5%, 5-10%, >10%). Also, provide details thereof, in about 50 words or so.

It is the Company's ongoing endeavor to have a mechanism to recycle its products and limit the waste arising out of production of vehicles. The Company has initiated well defined program Prolife. The Company's objective is to reduce the waste and to minimize the need of raw materials to produce a brand new item. In Fiscal 2017, total of 24065 components were reconditioned. The re-conditioned long blocks are also being exported to international markets.
